

## Know Your Security Driver's Covid-19 status - SAFETY MEASURES

Hello,

We at VIP Security Transports & Finest Chauffeurs are constantly updating our safety measures and wanted to inform you of our latest changes which are highlighted below.

**We're encouraging our drivers to routinely get COVID-19 tested & COVID-19 antibodies tested. With driver approval we'll share the following information with clients which will appear under the driver's name & number. You can also request a driver with an option you're most comfortable with, & if possible, we'll make that driver available.**

A, B, & C options available for all bookings

- A. Covid-19 negative / last date tested**
- B. Covid-19 antibodies, (negative or positive) & last date tested**
- C. No information available**

### Enhanced bookings

**Gold booking** - Driver or guard tested 30 days or less

**Platinum booking** - Driver or guard tested 3 - 4 days prior. If you have a client or family member visiting the New York Tristate area for an extended stay & their health & safety is of utmost concern, & if you book well in advance of the client's arrival, we'll have our driver, guard, assistant, Covid tested just prior to the client's arrival. In addition to driving & or providing security services, our team members can provide personal assistant duties, run errands & act as a go between the client & all others who haven't been recently Covid tested to limit the client's possible exposure.

### Additional safety measures:

1. The Company checks **Security Driver's** temperature when **Security Drivers** pick-up company vehicles. If the **Security Driver** has a temperature, we will attempt to replace the **Security Driver**, and if not possible, we will cancel the booking.
2. We spray and wipe down the entire cabin with a disinfectant
3. We then use a Travel UV sanitizing wand, to scan / wand the interior vehicle, which is scientifically proven to reduce bacteria in fabric and in the air.

4. We'll place Chiro rolls paper over the head rest, so you can rest your head on freshly placed paper. This is the same paper used in doctors' offices.
5. We've stocked vehicles with anti-bacterial hand wipes and Purell gel for Clients & drivers. Vehicles will also be stocked with courtesy mask for clients who may forget to wear a mask.
6. Our **Security Drivers** will wear mask and gloves, and we're requiring our clients to wear a mouth covering as well
7. When clients require vented heat or air conditioner, our driver will set the vehicle to source fresh air from outside the vehicle, into the car, instead of recirculating air inside the vehicle.

YES

NO

8. If the client doesn't require vented heat or air conditioner, we'll encourage clients and **Security Drivers** to open the window or sunroof for fresh air, to constantly vent fresh air into the vehicle, if there is no objection from the client.

**Final note:** We at VIP Security Transports believe that minimizing your number of daily & weekly personal contacts is the best way forward. If a CEO or family uses one dedicated **Security Driver, (and knows that Security Driver's Covid-1 status on an updated basis)** that lowers their risk tremendously, versus using five different Uber/app drivers during the week. You can safely estimate (pre-covid-19) the average person, makes on average ten personal contacts per day, between family, friends, store clerk, random person on street etc., and if you times that by five different Uber drivers, you have 50 plus direct & indirect contacts, during the week, versus a steady driver who will have for the most part the same daily 6 contacts, plus 4 new daily contacts.

Lastly, when using different Uber drivers, you don't know what safety precautions they are initiating on a regular basis, if any, ours are listed above. **Let us be a part of your team to keep your CEO, key executives & family members with underlying conditions safe & healthy.**
